Who is allowed to do what in your project?

Upload Public Keys

Upload your "functionary" (the people who do the things) public keys. If you don't have any keys, you can easily generate them using our [in-toto key generation tool](#).

bob.pub

carl.pub

Public Key Dropzone

Authorize your functionaries to perform steps

Steps	Bob	Carl	Threshold
voluptate	<input type="checkbox"/>	<input type="checkbox"/>	1
sunt	<input type="checkbox"/>	<input checked="" type="checkbox"/>	1
anim	<input checked="" type="checkbox"/>	<input type="checkbox"/>	1
fugiat	<input checked="" type="checkbox"/>	<input type="checkbox"/>	1
velit	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	2

Security Restriction Assessment

In order to generate a layout for you, you have to perform an in-toto Dry Run. We use the resulting metadata to generate your custom layout.
Just past the following commands in a terminal and upload the resulting *.link files

Copy/Paste Commands

```
$ in-toto-run --materials . --products . --step-name clone -- git clone git@github.com:in-toto/in-toto.git@1.0
$ in-toto-run --materials . --products . --step-name lint -- flake8 in-toto
$ in-toto-run --materials . --products . --step-name package -- tar --exclude 'git' -zcvf in-toto.tar.gz in-toto
```

Upload *.link files

voluptate.link

sunt.link

anim.link

fugiat.link

velit.link

deserunt.link

```
graph LR; voluptate --> sunt; voluptate --> anim; voluptate --> fugiat; sunt --> velit; anim --> velit; fugiat --> velit; velit --> deserunt
```

We generated your software supply chain layout for you. All you have to do now is:

1. **Download** the layout (you can still edit it offline - it is just a JSON - file or using the web based editor)

2. **sign** it with your project owner key,

3. instruct your functionaries to perform their steps using **in-toto tools**, and

4. ship out **in-toto metadata** along with your software
